

# BAMBOO™ Ink

## New and smart ways to capture your ideas

A good idea has struck? With Bamboo Ink, it can be jotted down instantly: Pressing this smart pen's top button launches the Windows Ink Workspace or a pen-enabled app like Sticky Notes or the new and flexible Bamboo Note.

(Bamboo Note app available soon.)

## Smart inside, ergonomic outside

Bamboo Ink will let you forget that you're using a high-tech smart stylus on a digital screen. It is designed for natural writing and sketching with a choice of different fine nibs (soft, medium, firm), an ergonomic triangular design and a soft-touch surface – providing a very good in-hand feel. Its pressure sensing turns every stroke into a precise digital reflection of the user's ideas.

## One pen for many devices

Bamboo Ink is optimized for Windows Ink and it works with a great range of pen-enabled Windows 10 tablets and touchscreen PCs. The stylus is preset for the Wacom AES protocol. If one is using a device with Microsoft Pen Protocol (MPP), switching is easy by simply pressing and holding both side buttons.

Bamboo Ink is the optimal and most flexible choice, to buy as a bundle with a new device, to make full use of the functionality of an earlier-purchased pen-enabled device, or to replace a lost pen.

See the list of tested devices under [www.wacom.com/comp](http://www.wacom.com/comp)

Optimized for Windows Ink

# Bamboo Ink

## Product specifications

Color(s)	black
Stylus length	147 mm (5.8 in)
