ADAPTIVE CRUISE

Le grandi ruote (diametro: anteriori 215 mm; posteriori 290 mm) permettono di affrontare agilmente tutti i terreni e superare ogni ostacolo con facilità.

La conformazione dei pneumatici in gomma a doppio strato interno differenziato, riduce le vibrazioni e le sollecitazioni trasmesse al bambino e all'impugnatura dalle asperità del terreno.

Il sistema brevettato di regolazione delle sospensioni indipendente su ogni ruota, garantisce il comfort ottimale al bambino in ogni fase della sua crescita.

The large wheels (diameter: front 215 mm; rear 290 mm) make it easy to tackle all terrains and overcome any obstacle.

The hard wearing tires, with their unique multi-layer construction, adapts to all surfaces and reduces vibrations and stress transmitted to the child and the handle by the roughness of the terrain.

The patented independent suspension adjustment system on each wheel ensures optimal comfort for the child in every phase of their growth.
