# HP2

Wire-Free Peephole Door Viewer
See visitors, from wherever you are

Gone are the days when you had to lean against the small peephole to find out who was at your front door. The HP2 integrates a compact peephole camera and an indoor screen, so you can see what's going on at a quick glance – even remotely via your phone. The HP2 is battery-powered and features a privacy-focused design, providing easy installation, enhanced visibility and improved protection in one simple kit.

Live View from Anywhere	4.3-Inch Indoor Color Screen	1080p Resolution
146° Wide-Angle View	2,200 mAh Rechargeable Lithium Battery	Supports 2.4 GHz Wi-Fi
Easy Installation	Fits 14-26 mm Hole	

Turn your peephole into a wide-angle, sharp camera

Stop worrying that you can't see well enough through a narrow peephole. With the HP2's smart lens, you can now get a much wider, clearer picture of who's coming and going. From the delivery person's face to what he is holding in his hands, it's hard to miss a thing.

**146° Wide-Angle View**

F1.6 Large Aperture

146°

Designed to blend in naturally

Offering two color options, the compact camera fits elegantly into your door without being visually intrusive. Apart from removing the existing peephole, no permanent changes or damage to your door are needed. It could also better protect your privacy, too. With the HP2 in place, people from the outside can no longer look into the hole.

Your front-door security is now just a tap away

Whether you're out running errands or just too lazy to get off the couch, just use your phone to check on activities at the hallway. On the EZVIZ App, you can easily load live video to always stay in the loop.
4.3-Inch Color Screen

View on a big screen, not through a tiny hole

With the HP2, you don't have to go all the way to the door before you know who's knocking. With the large 4.3-inch color screen right on the inside of your door, you can see live feeds and effortlessly identify visitors even from a distance.[1]
A thoughtful product to see more, but worry less

Compatible Door
Thickness:
35 - 105mm

Compatible Peephole
Diameter:
14 - 26mm

Made for long-lasting security

To guard the door and make you feel secure around the clock,
the HP2 uses a built-in battery with a relatively long standby time,
so you don't no need to recharge it frequently.

Built to fit easily and tightly

The HP2 is easy to install without complicated wiring or tools,
as long as there's a compatible hole on your door. You can have
the door viewer up and running in no time, all by yourself.

1 For the indoor screen to render live video feeds, users need to first manually switch on the screen with the physical button on the device body.
