# Dolby Vision

# HDR10+

A composite image featuring a humpback whale breaching a vast sea of clouds. The scene is set against a dramatic sunset sky with warm orange and red hues. The whale is captured mid-leap, with its large pectoral fin extended and water droplets trailing behind it. At the bottom center, a small black projector sits on a stand, projecting a beam of light upwards towards the whale. Overlaid on the lower half of the image is large, bold, yellow text with a white outline.

# Every corner glitters

View whatever you're watching in 2600 lumens of brightness, be it deep shadows or bright highlights. Your picture is that much more compelling when you're taking it in with maximum vibrancy and detail.

 **2600** Lumens  

# Project beyond boundaries walls, ground, and ceiling

Calibrate your projector to your ideal viewing angle with a gimbal that can swing the machine 360° horizontal and 135° vertical. It's a breeze to project movies both on a screen and ceiling.

## Gimbal Design

# Quickly Fit and extreme clarity by 3D TOF

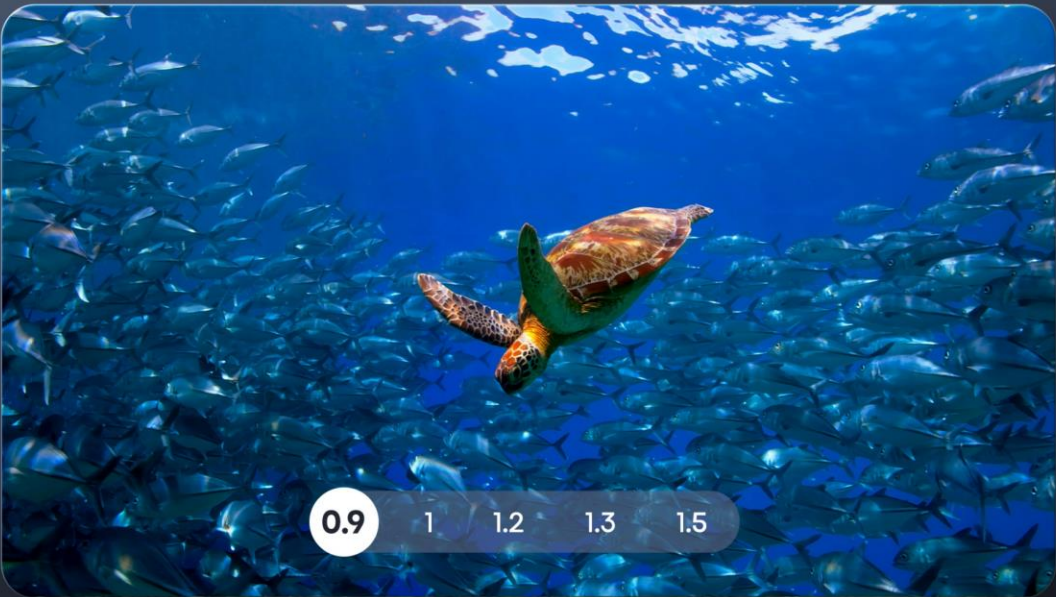

Perceive depth as accurately as possible with 3D Time of Flight. The high-power sensors are calibrated to show distance on the screen.

# Zoom in! Zoom out!

Zoom in and out without compromising picture sharpness or clarity. The 1.67 flexible zoom keeps the image at 4K, however close you get.

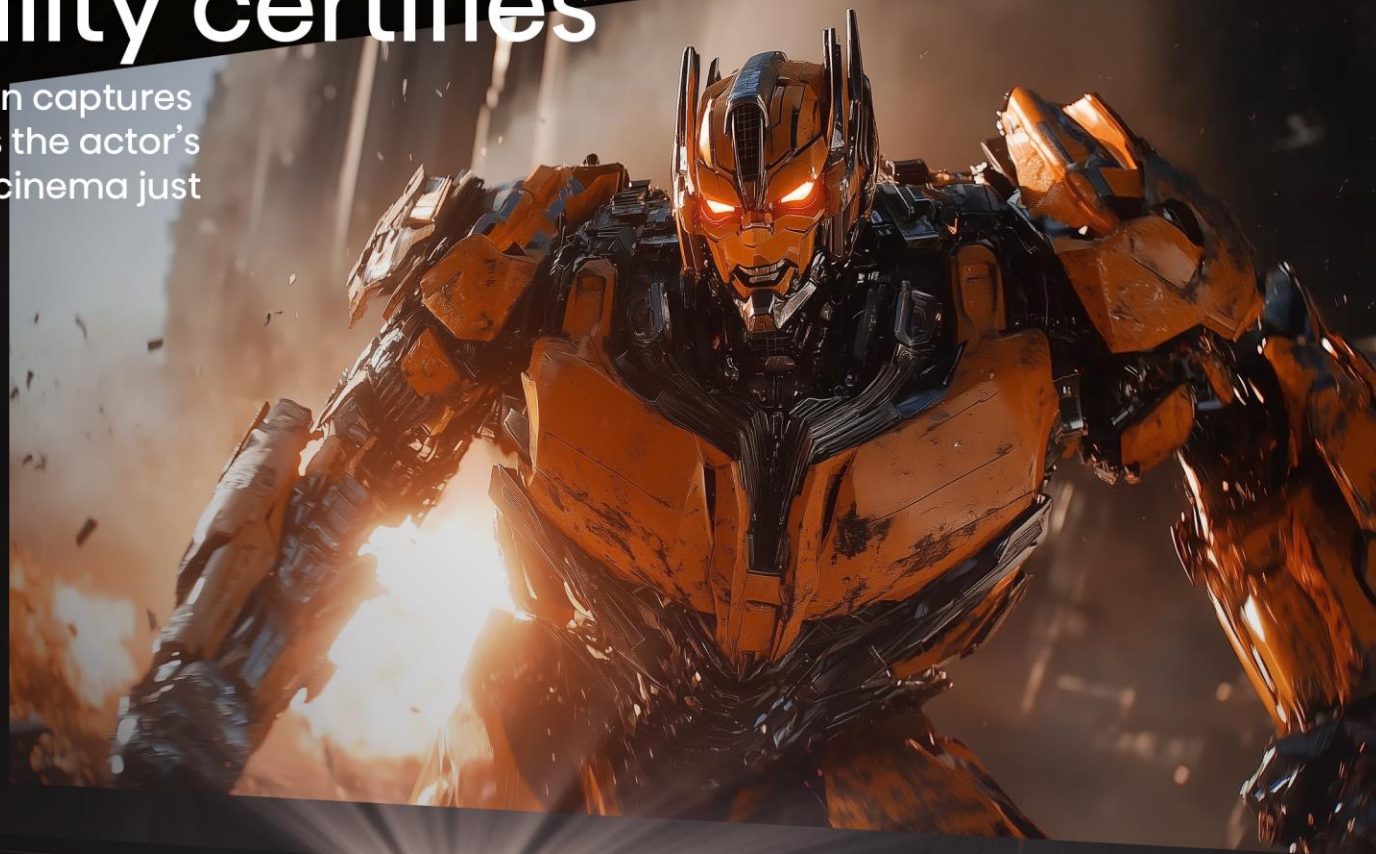

Optical Zoom  
**0.9~1.5:1**

Image Size (inch)	Projected Distance Range(m)		
	0.9:1	~	1.5:1
65"	1.3	~	2.2
80"	1.6	~	2.7
100"	2.0	~	3.3
110"	2.2	~	3.7
120"	2.4	~	4.0
150"	3.0	~	5.0
200"	4.0	~	6.6
300"	6.0	~	10.0

# Grand-slam quality certifies

Get transported through the screen. Dolby Vision captures even the most subtle emotions flickering across the actor's face during a dark night scene. Appreciate the cinema just as the filmmakers intended.
